

INTRODUCTION

“Company’s Name” has established a Quality Management System (QMS) that defines the company’s policies and control mechanisms across all functions. This manual outlines the structure of the QMS, which conforms to the requirements of the international standard **ISO 9001:2015**. The system is designed to enhance customer satisfaction through the continual improvement of processes and products, while ensuring compliance with applicable customer and regulatory requirements.

The organization’s key management processes and their interactions are illustrated in the **Process Interaction Diagram (Appendix A)**

4 Context of “Company’s Name”

4.1 Understanding “Company’s Name” and its context)

“COMPANY’S NAME” determines external and internal issues that are relevant to its purpose and its strategic direction that affect its ability to achieve the intended result(s) of its quality management system. “COMPANY’S NAME” monitors and reviews information about these external and internal issues which are identified on the [SWOT Analysis FM4.1-1](#) and are reviewed by management at a minimum of once a year during Management Review.

4.2 Understanding the needs and expectations of interested parties

Interested parties relevant to “COMPANY’S NAME” QMS are:

- Customers
- Employees
- Stakeholders
- Financial Institutions
- Certification Bodies
- Regulatory Bodies
- Suppliers

The needs and expectations of these parties and the associated risks and opportunities have been identified in the [Interested Parties Matrix FM 4.2-1](#).

4.3 Determining the scope of the quality management system

“COMPANY’S NAME” has determined the boundaries and applicability of the Management System to establish its scope. **The scope of “COMPANY’S NAME”’s management system includes distribution of electrical components products including wire harnesses, sensing devices for the au** for the automotive industry.

The following locations are included in the scope of the Management System:

2341 Alger Dr. Troy, Michigan 48083

"Company's Name" is not product design responsible. Exclusions include Product Design - IATF 16949 Clause 8.3 since SUST manufactures products per customer specifications.

When determining this scope, "COMPANY'S NAME" considered:

- a) the external and internal issues referred to in 4.1;
- b) the requirements of relevant interested parties referred to in 4.2;
- c) the products and services provided by the organization;
- d) supporting functions; and
- e) allowable exclusions from customers and regulatory agencies;
- f) as well as customer-specific requirements.

4.4 Quality Management System and its processes

Process interactions are shown in the QMS Process Interaction Map, QPM-001 in Appendix A.

4.4.1

"Company's Name" ("COMPANY'S NAME") has established, implemented, and maintains a process-based Quality Management System (QMS) that conforms to the requirements of ISO 9001:2015 and is continually improved to enhance performance and customer satisfaction. The QMS includes all necessary processes and their interactions, applied across the organization, and is designed to ensure effective planning, execution, monitoring, and improvement.

In alignment with clause 4.4.1 of the Standard, "COMPANY'S NAME" has:

- a) Identified the required inputs and expected outputs for each process;
- b) Defined the sequence and interaction of these processes (see Process Interaction Diagram – Appendix A);

-
- c) Applied criteria and methods, including monitoring and measurement, to ensure effective process control and performance;
 - d) Determined and provides the resources necessary to support process operation;
 - e) Assigned roles, responsibilities, and authorities for managing each process;
 - f) Addressed risks and opportunities in accordance with Clause 6.1;
 - g) Evaluates process performance and implements changes as needed to achieve intended results; and
 - h) Pursues continual improvement of the processes and the QMS as a whole

4.4.2

"Company's Name" maintains and retains documentation as required by the ISO 9001: 2015 standard within its QMS.

5 Leadership

5.1 Leadership and Commitment

5.1.1 General

Top Management demonstrates leadership and commitment with respect to the quality management system according to the requirements of the standard. Top management's commitment to the QMS is acknowledged on the Leadership Commitment Statement Doc.#FM-5.1-1.

5.1.2 Customer Focus

Top Management demonstrates leadership and commitment with respect to customer focus by ensuring the requirements of the standard are met.

5.2 Policy

5.2.1 Establishing the quality policy

Management has developed a quality policy as listed below.

At "COMPANY'S NAME" we are dedicated to delivering high-quality automotive parts with a strong focus on customer satisfaction and on-time delivery.

We are committed to:

-
- **Meeting or exceeding customer and regulatory requirements**
 - **Continually improving our Quality Management System**
 - **Building lasting relationships through reliable service and consistent performance**

Every employee plays a vital role in upholding these commitments and contributing to a culture of quality and continuous improvement.

“COMPANY’S NAME” has ensured the quality policy:

- is appropriate to the purpose and context of “Company’s Name”
- provides framework for setting quality objectives
- includes a commitment to satisfy applicable requirements
- includes a commitment to continual improvement of the quality management system

5.2.2 Communicating the quality policy

The quality policy

- is available and maintained as documented information
- is communicated, understood, and applied by all employees of “Company’s Name”
- is available to relevant interested parties via “Company’s Name” website

5.3 Organizational roles, responsibilities and authorities

Top management ensures that the responsibilities and authorities for relevant roles are assigned, communicated and understood within “Company’s Name”

Top management assigns the responsibility and authority for:

- a) ensuring that the quality management system conforms to the requirements of this International Standard;
- b) ensuring that the processes are delivering their intended outputs;

-
- c) reporting on the performance of the quality management system and on opportunities for improvement (see 10.1), in particular to top management;
 - d) ensuring the promotion of customer focus throughout "Company's Name";
 - e) ensuring that the integrity of the quality management system is maintained when changes to the quality management system are planned and implemented.

6 Planning

6.1 Actions to address risks and opportunities

6.1.1 When planning for the quality management system, "Company's Name" considers the issues referred to in 4.1 and the requirements referred to in 4.2 and determine the risks and opportunities that need to be addressed to:

- a) give assurance that the quality management system can achieve its intended results(s);
- b) enhance desirable effects;
- c) prevent, or reduce, undesired effects;
- d) achieve improvement.

6.1.2 "Company's Name" plans:

- a) actions to address these risks and opportunities;
- b) how to:
 - 1) integrate and implement the actions into its quality management system processes (see 4.4);
 - 2) evaluate the effectiveness of these actions.

Actions taken to address risks and opportunities shall be proportionate to the potential impact on the conformity of products and services.

NOTE 1 - Options to address risks can include avoiding risks, taking risks in order to pursue an opportunity, eliminating the risk source, changing the likelihood or consequences, sharing the risk, or retaining risk by informed decision.

NOTE 2 - Opportunities can lead to the adoption of new practices, launching new products, opening new markets, addressing new customers, building partnerships, using new technology and other desirable and viable possibilities to address "Company's Name"'s or its customers' needs.

6.2 Quality objectives and planning to achieve them

6.2.1 “Company's Name” has established quality objectives at relevant functions, levels and processes needed for the quality management system.

The quality objectives:

- a) are consistent with the quality policy;
- b) are measurable;
- c) take into account applicable requirements;
- d) are relevant to conformity of products and services and to enhancement of customer satisfaction;
- e) are monitored;
- f) are communicated;
- g) are updated as appropriate.

“Company's Name” Maintains documented information on the quality objectives as referenced in the [KPI Dashboard FM 6.2-1](#).

6.2.2 When planning how to achieve its quality objectives, “Company's Name” determines:

- a) what will be done;
- b) what resources will be required;
- c) who will be responsible;
- d) when it will be completed;
- e) how the results will be evaluated

6.3 Planning of changes

When “Company's Name” determines the need for changes to the quality management system, the changes are carried out in a planned manner (see 4.4).

“Company's Name” considers:

- a) the purpose of the changes and their potential consequences;
- b) the integrity of the quality management system;
- c) the availability of resources;
- d) the allocation or reallocation of responsibilities and authorities.

7 Support

7.1 Resources

7.1.1 General

“Company's Name” determines and provides the resources needed for the establishment, implementation, maintenance and continual improvement of the quality management system.

“Company's Name” considers;

- a) the capabilities of, and constraints on, existing internal resources;
- b) what needs to be obtained from external providers.

7.1.2 People

“Company's Name” shall determine and provide the persons necessary for the effective implementation of its quality management system and for the operation and control of its processes.

7.1.3 Infrastructure

“Company's Name” determines, provides and maintains the infrastructure necessary for the operation of its processes and to achieve conformity of products and services.

NOTE Infrastructure can include:

- a) building and associated utilities;
- b) equipment, including hardware and software;
- c) transportation resources;
- d) information and communication technology.

7.1.4 Environment for the operation of processes

“Company's Name” determines, provides and maintains the environment necessary for the operation of its processes and to achieve conformity of products and services.

NOTE: A suitable environment can be a combination of human and physical factors, such as;

- a) social (e.g. non-discriminatory, calm, non-confrontational);
- b) psychological (e.g. stress-reducing, burnout prevention, emotionally protective);
- c) physical (e.g. temperature, heat, humidity, light, airflow, hygiene, noise).

These factors can differ substantially depending on the products and services provided.

7.1.5 Monitoring and measuring resources

7.1.5.1 General

"Company's Name" determines and provides the resources needed to ensure valid and reliable results when monitoring or measuring is used to verify the conformity of products and services to requirements.

"Company's Name" ensures that the resources provided:

- a) are suitable for the specific type of monitoring and measurement activities being undertaken;
- b) are maintained to ensure their continuing fitness for their purpose.

"Company's Name" retains appropriate documented information as evidence of fitness for purpose of the monitoring and measurement resources.

7.1.5.2 Measurement traceability

When measurement traceability is a requirement, or is considered by "Company's Name" to be an essential part of providing confidence in the validity of measurements results, measuring equipment is:

- a) calibrated or verified, or both, at specified intervals, or prior to use, against measurement standards traceable to international or national measurement standards; when no such standards exist, the basis used for calibration or verification shall be retained as documented information;
- b) identified in order to determine their status;
- c) safeguarded from adjustment, damage or deterioration that would invalidate the calibration status and subsequent measurement results.

"Company's Name" performs a risk analysis if the condition of the gage "as found" is out of specification.

NOTE: A gage number is assigned to each piece of measuring equipment.

7.1.6 Organizational knowledge

"Company's Name" determines the knowledge necessary for the operation of its processes and to achieve conformity of products and services. This knowledge is maintained and made available to the extent necessary. When addressing changing needs and trends, "Company's Name" considers its current knowledge and determine how to acquire or access any necessary additional knowledge and required updates.

7.2 Competence

"Company's Name" does:

- a) determine the necessary competence of person(s) doing work under its control that affects the performance and effectiveness of the quality management system;
- b) ensure that these persons are competent on the basis of appropriate education, training, or experience through reviews;
- c) where applicable, take actions to acquire the necessary competence, and evaluate the effectiveness of the actions taken;
- d) retain appropriate documented information as evidence of competence within the skills competency matrix.

These requirements are identified in the Competency Training Procedure 7.2-2

7.3 Awareness

"Company's Name" ensures that persons doing work under "Company's Name"'s control are aware of:

- a) the quality policy;
- b) relevant quality objectives;
- c) their contribution to the effectiveness of the quality management system, including the benefits of improved performance;
- d) the implications of not conforming with the quality management system requirements.

These communications are handled through the orientation process and Town Hall meetings.

7.4 Communication

"Company's Name" determines the internal and external communications relevant to the quality management system to determine:

- a) on what it will communicate;
- b) when to communicate;

-
- c) with whom to communicate;
 - d) how to communicate;
 - e) who communicates.

7.5 Documented Information

7.5.1 General

"Company's Name"'s quality management system includes:

- a) documented information required by this International Standard;
- b) documented information determined by "Company's Name" as being necessary for the effectiveness of the quality management system.

7.5.2 Creating and updating (refer to Doc ID: [QP-7.5 Documented Information Procedure](#)).

When creating and updating documented information, "Company's Name" ensures appropriate:

- a) identification and description (e.g. a title, date, author, or reference number);
- b) format (e.g. language, software version, graphics) and media (e.g. paper, electronic);
- c) review and approval for suitability and adequacy.

7.5.3 Control of documented information (Record Control) (refer to Doc ID: [QP-7.5 Documented Information Control Procedure](#)).

7.5.3.1 Documented information required by the quality management system and by the International Standard are controlled to ensure:

- a) It is available and suitable for use, where and when it is needed;
- b) it is adequately protected (e.g. from loss of confidentiality, improper use, or loss of integrity).

7.5.3.2 For the control of documented information, "Company's Name" addresses the following activities, as applicable:

- a) distribution, access, retrieval and use;

-
- b) storage and preservation, including preservation of legibility;
 - c) control of changes (e.g. version control);
 - d) retention and disposition.

Documented information of external origin determined by "Company's Name" to be necessary for the planning and operation of the quality management system are identified as appropriate, and controlled. Documented information retained as evidence of conformity are protected from unintended alterations.

8 Operation

8.1 Operational planning and control

"Company's Name" plans, implements and controls the processes needed to meet the requirements for the provisions of products and services, and to implement the actions determined in Clause 6, by:

- a) determining the requirements for the products and services;
- b) establishing criteria for:
 - 1. the processes;
 - 2. the acceptance of products and services;
- c) determining the resources needed to achieve conformity to the product and service requirements;
- d) implementing control of the processes in accordance with the criteria;
- e) determining, maintaining and retaining documented information to the extent necessary:
 - 1. to have confidence that the processes have been carried out as planned;
 - 2. to demonstrate the conformity of products and services to their requirements.

The output of this planning is suitable for "Company's Name"'s operations.

"Company's Name" controls planned changes and reviews the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary.

"Company's Name" ensures that outsourced processes are controlled.

8.2 Requirements for products and services (refer to [Process Map – Sales, Doc ID: QPM-002](#)).

8.2.1 Customer Communication

Communication with customers includes:

- a) providing information relating to products and services;
- b) handling inquiries, contracts or orders, including changes;
- c) obtaining customer feedback relating to products and services, including customer complaints;
- d) handling or controlling customer property;
- e) establishing specific requirements for contingency actions, when relevant.

8.2.2 – Determining the requirements for products and services

When determining the requirements for the products and services to be offered to customers, "Company's Name" ensures that:

- a) the requirements for the products and services are defined, including:
 - i. any applicable statutory and regulatory requirements;
 - ii. those considered necessary by "Company's Name";
- b) "Company's Name" can meet the claims for the products and services it offers.

8.2.3 Review of the requirements for products and services

8.2.3.1

"Company's Name" ensures that it can meet the requirements for products and services to be offered to customers. "Company's Name" conducts a review before committing to supply products and services to a customer, to include:

- a) requirements specified by the customer, including the requirements for delivery and post-delivery activities;
- b) Requirements not stated by the customer, but necessary for the specified or intended use, when known;
- c) requirements specified by "Company's Name";
- d) statutory and regulatory requirements applicable to the products and services;
- e) contract and order requirements differing from those previously expressed.

"Company's Name" ensures that contract or order requirements differing from those previously defined are resolved. "Company's Name" conducts a contract review with each PO received.

The customer's requirements are confirmed by "Company's Name" before acceptance through a cross functional contract review, when the customer does not provide a documented statement of their requirements.

8.2.3.2 "Company's Name" retains documented information, as applicable:

- a) on the results of the review;
- b) on any new requirements for the products and services.

8.2.4 Changes to requirements for products and services

"Company's Name" ensures that relevant documented information is amended, and that relevant persons are made aware of the changed requirements, when the requirements for products and services are changed.

8.3 Design and development of products and services

8.3.1 General

"Company's Name" established, implemented and maintained a design and development process that is appropriate to ensure the subsequent provisions of products and services.

"Company's Name" is not product design responsible.

8.3.2 Design and Development Planning

In determining the stages and controls for design and development, "Company's Name" has considered:

- a) the nature, duration and complexity of the design and development activities;
- b) the required process stages, including applicable design and development reviews;
- c) the required design and development verification and validation activities;
- d) the responsibilities and authorities involved in the design and development process;
- e) the internal and external resource needs for the design and development of products and services;
- f) the need to control interfaces between persons involved in the design and development process;

-
- g) the need for involvement of customer and users in the design and development process;
 - h) the requirements for subsequent provision of products and services;
 - i) the level of control expected for the design and development process by customers and other relevant interested parties;
 - j) the documented information needed to demonstrate that design and development requirements have been met.

These activities are limited based on the scope of activities as a distributor.

"COMPANY'S NAME" does not manufacture products and is not product design responsible.

8.3.3 Design and Development Inputs

"Company's Name" determines the requirements essential for the specific types of services to be designed and developed. "Company's Name" "COMPANY'S NAME" is focused on meeting the requirements of the customers by ensuring the product purchased from their suppliers meets the following requirements:

- a) functional and performance requirements;
- b) information derived from previous similar design and development activities;
- c) statutory and regulatory requirements;
- d) standards or codes of practice that "Company's Name" has committed to implement;
- e) potential consequences of failure due to the nature of the products and services.

Inputs are adequate for design and development purposes, complete and unambiguous.

"Company's Name" retains documented information to design and development inputs.

"Company's Name" is not product design responsible. We are a distributor of manufactured product designed by our suppliers.

8.3.4 Design and development controls

"Company's Name" applies controls to the design and development process to ensure that:

- a) the results to be achieved are defined;

-
- b) reviews are conducted to evaluate the ability of the results of design and development to meet requirements;
 - c) verification activities are conducted to ensure that the design and development outputs meet the input requirements;
 - d) validation activities are conducted to ensure that the resulting products and services meet the requirement for the specified application or intended use;
 - e) any necessary actions are taken on problems determined during the reviews, or verification and validation activities;
 - f) documented information of these activities is retained.

“Company's Name” is not product design responsible due to the organization being distributor “Our product is designed by our customer(s).

8.3.5 Design and Development Outputs

Process design and development outputs are provided in a form that enables verification against process design and development inputs and are approved prior to release.

Process design and development outputs:

- a) meet input requirements
- b) provide appropriate information for purchasing, production, and service provision
- c) contain or reference product acceptance criteria
- d) specify the characteristics of the product that are essential for its safe and proper use are approved prior to release

8.3.6 Design and Development Changes

Process design and development changes are identified and records maintained. Changes are reviewed, verified, and validated – as appropriate – and approved prior to implementation.

The review includes the impact of the change on constituent parts and product already delivered. Changes may necessitate a Product/Process Approval from the customer.

8.4 Control of externally provided processes, products and services

8.4.1 General

"Company's Name" ensures that purchased products conform to specified purchase requirements as referenced in QP 8.4.1 Purchasing Procedure.

The type and extent of control applied to suppliers is dependent on the effect of the purchased product on subsequent product realization or the final product.

"Company's Name" evaluates and selects suppliers based on their ability to supply product in accordance with requirements.

Records of supplier evaluation and necessary action resulting from supplier evaluation are maintained according to the Record Retention Matrix.

8.4.2 Type and extent of control

Purchasing information describes the product to be purchased, including – where appropriate:

- requirements for approval of the product
- requirements for qualification of personnel
- quality management system requirements

"Company's Name" ensures the adequacy of specified purchase requirements prior to communication to the supplier.

"Company's Name" has implemented verification activities suitable to verify purchased product. If verification is to be performed at the supplier's premises it is stated on the purchasing documentation detailing verification arrangements and method of product release.

8.4.3 Information for external providers

8.5 Product and service provision

8.5.1 Control of production and service provision

"Company's Name" plans and carries out production and service provision under controlled conditions. Controlled conditions include – as appropriate:

-
- a) the availability of information that describes the characteristics of the product
 - b) the availability of work instructions – as necessary
 - c) the use of suitable equipment
 - d) the availability of monitoring and measurement devices
 - e) the implementation of monitoring and measurement
 - f) the implementation of release and delivery

8.5.2 Identification and Traceability

“Company's Name” identifies the product by suitable means throughout product realization.

“Company's Name” also identifies – by suitable means – what measurements and tests have been completed on the product, and the status of the product relative to those activities.

8.5.3 Property belonging to customers or external providers

“Company's Name” exercises care with customer property (including tooling, gaging, and returnable packaging) while it is under the facility's control.

“Company's Name” identifies, verifies, protects, and safeguards customer property that is provided for use or incorporation into the product.

If customer property is lost, damaged, or otherwise found to be unsuitable for use, it is reported to the customer in writing.

8.5.4 Preservation

“Company's Name” preserves the conformity of product during internal processing and – where contractually required – delivery to the intended destination.

Preservation of product includes identification, handling, packaging, storage, and protection.

Preservation also applies to the constituent parts of a product.

8.5.5 Post-delivery activities – “COMPANY'S NAME” is a service provider and does not provide post delivery activities.

8.5.6 Control of changes

8.6 Release of product and services

The organization has implemented planned arrangements, at appropriate stages, to verify that the product and service requirements have been met.

The release of products and services to the customer does not proceed until the planned arrangements have been satisfactorily completed, unless otherwise approved by a relevant authority and, as applicable, by the customer.

The organization retains documented information on the release of products and services. The documented information includes:

- a) evidence of conformity with the acceptance criteria;
- b) traceability to the person(s) authorizing the release.

8.7 Control of Nonconforming Product

Product that does not conform to specified requirements is identified and controlled to prevent its unintended use or delivery. Controls and related responsibilities and authorities for the disposition of nonconforming product are defined in QP 10.2 NC/Corrective Action.

Nonconforming product is dispositioned in one or more of the following ways:

- a) take action to eliminate the detected nonconformance.
- b) authorize its use, release, or acceptance under concession by a relevant authority, and – where applicable – by the customer
- c) take action to preclude its original intended use or application.

Records of the nature of the nonconformance, and any actions taken – including concessions obtained – are maintained.

When nonconforming products are corrected, it is subject to re-verification to demonstrate conformance to requirements.

If "COMPANY'S NAME" suspects a non-conforming product being shipped to the customer, the customer will be notified according to the QP 10.2 NC/Corrective Action Procedure.

9 Performance evaluation

9.1 Monitoring, measurement, analysis and evaluation

9.1.1 General

"Company's Name" plans and implements the monitoring, measurement, analysis and improvement processes needed to:

- demonstrate conformance of the product
- ensure conformance of the quality management system
- continually improve the effectiveness of the quality management system

This includes determination of appropriate methods, including statistical techniques, and the extent of their use.

9.1.2 Customer Satisfaction

"Company's Name" monitors information relating customer perception of whether customer requirements have been met.

9.1.3 Analysis and evaluation

Appropriate data is collected and analyzed to demonstrate suitability and effectiveness of the quality management system and to evaluate where continual improvement of the effectiveness of the system can be made.

Data includes results of monitoring and measurement and other relevant resources.

The analysis of data provides information in the following areas:

-
- customer satisfaction
 - conformance to product requirements
 - characteristics and trends of processes and products including opportunities for preventive action
 - suppliers

9.2 Internal Audit (Refer to Internal Audit Procedure – QP 9.2)

9.2.1 Conducts internal audits at planned intervals to provide information on whether the Management System:

- a) conforms to:
 - 1) the organization's own requirements for its Management System;
 - 2) the requirements of the ISO 9001 Standard, IATF 16949 and the requirements of interested parties;
- b) is effectively implemented and maintained

9.2.2 The organization:

- a) plans, establishes, implements and maintains an audit program(s) including the frequency, methods, responsibilities, planning requirements and reporting, which takes into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits;
- b) defines the audit criteria and scope for each audit;
- c) selects auditors and conduct audits to ensure objectivity and the impartiality of the audit process;
- d) ensures that the results of the audits are reported to relevant management;
- e) takes appropriate correction and corrective actions without undue delay;
- f) retains documented information as evidence of the implementation of the audit program and the audit results.

9.3 Management Review

9.3.1 General

Management reviews are conducted with the Management, at intervals sufficient to ensure its continuing suitability and effectiveness in satisfying customer expectations, ISO 9001:2015 and requirements, and stated quality policy and objectives.

Management review is conducted at a minimum on a monthly basis, refer to Management Review Procedure – QP 9.3

9.3.2 Management review inputs

The inputs to management review include:

- results of audits
- customer feedback
- process performance and product conformity (data)
- status of corrective and preventive actions
- follow up actions from previous management reviews
- changes that could affect the quality system
- recommendations for improvement
- (5.6.2.1) Analysis of actual and potential field failures and their impact on quality, safety, or the environment

9.3.3 Management Review Outputs

The output from the management review includes decisions and actions related to:

- improvement of the effectiveness of the quality system and its processes
- improvement of products related to customer requirements
- resource needs

Output from Management Review is documented Meeting Minutes and Key Measurables.

10 Improvement

10.2 Nonconformity and corrective action See QP10.2 – Nonconformance and Corrective Action Procedure

10.3 Continual Improvement

“Company's Name” continually improves the effectiveness of the quality system using the quality policy, quality objectives, audit results, analysis of data, corrective and preventive actions, and management review.
